PayPal Honey was on the page as Impact partners' clicks changed

22 sessions arrived through Impact partners, then PayPal Honey was detected and the click changed. 3 orders followed. Partners whose clicks changed most: CashbackClub (7), Priya Makes (6), Jon Ortiz (5). Over the last 30 days PayPal Honey stood down in 92% of 291 Impact partner sessions (89–95%).

Path: Arrived via Impact → Basket → PayPal Honey detected → Click moved to Awin 2 min later

Sessions	Orders	Order revenue	Commission at stake
22	3	$258.37	$15.50

PayPal Honey's stand-down for Impact

Stood down	95% range	Partner sessions	Clicks replaced
92%	89–95%	291	22

Over the last 30 days, in sessions that arrived through Impact partners while PayPal Honey was on the page or installed, the partner's click stayed unchanged in 92%. Each replaced click is listed below with its time, stage and change.

The question and the method

Do extensions stand down for your partners?

Sessions that arrived with a partner's click while an extension was on the page or installed, and whether the click then changed, to another network or to a new click on the same one. Benson looks back 30 days every hour.

Commission at stake uses Impact at 6.00%, the merchant's setting when the scan ran.

Limits

Benson records what changed and what was on the page when it changed. That's a match, not proof of who caused it. Benson sees storefront pages, not inside Shopify checkout, and only sessions it may track under the store's consent settings. The score counts sessions where Benson saw the extension: on the page, or installed (desktop Chrome, with consent).

Evidence carries no session or visitor ids. Order numbers are the store's own, so the network can match them to its transaction reports.

Affiliate integrity evidence · Extension took the click

Capital One Shopping was on the page as the click moved from Awin to CJ

6 sessions arrived through Awin, then Capital One Shopping was detected and the click changed to CJ. 1 order followed; 83% of the changes happened at the basket or checkout.

Path: Arrived through Awin → Browsed or added to basket → Capital One Shopping detected → Click changed to CJ

Sessions	Orders	Order revenue	Commission at stake
6	1	$114.99	$9.20

The question and the method

Did a coupon extension take the credit from the partner who sent the shopper?

The affiliate click a shopper arrived with, every later change to it, and the extensions detected at that moment, joined to the order. Benson looks back 30 days every hour.

Commission at stake uses Awin at 8.00%, the merchant’s setting when the scan ran.

Evidence (6 rows)

Time (UTC)	What	Arrived via	Changed to	Where	Revenue	At stake

VoucherHunt clicks arrived after shoppers had filled their basket

29 orders had a basket before any affiliate click, then picked up a click from VoucherHunt on Awin and ordered; in 7% checkout had already started. A coupon or cashback extension was detected in 7% of them.

Path: Arrived without an affiliate click → Filled the basket → VoucherHunt click arrived → Ordered

Sessions	Orders	Order revenue	Commission at stake
29	29	$2,389.36	$191.18

The question and the method

Are you paying commission on orders that were already at checkout?

Sessions that reached the basket or checkout before any affiliate click, then picked one up and ordered. Benson looks back 30 days every hour.

Commission at stake uses Awin at 8.00%, the merchant's setting when the scan ran.

Time (UTC)	What	Arrived via	Click from	Where	Time away	Came back from	Revenue	At stake
2026-09-23 02:13	Order #19003	Direct / none	Awin	Cart	30s	vouchersite.example	$51.99	$4.16

Limits

Benson sees storefront pages, not inside Shopify checkout, and only sessions it may track under the store's consent settings. A shopper who leaves to look for a code and comes back through a partner is real behaviour; whether to pay for it is your programme's rule.

Evidence carries no session or visitor ids. Order numbers are the store’s own, so the network can match them to its transaction reports.

File awin_declines_20261011_cmb_01m5c4hsthegdrqka4cjcyakrr.csv · 3 orders · Waiting on Awin

Generated 20 October 2026 at 09:51 by Benson · Batch cmb_01m5c4hsthegdrqka4cjcyakrr · SHA-256 df3e1e8d43c43b16

Orders	Sale amount	Commission	Commission source
3	$151.77	$12.14	Estimated

Why these orders

Each order below matched one of Benson's integrity checks on harbourandpine.example.com. A match is not proof: the merchant reviewed each one and asks Awin to decline its commission under the programme terms, for the reason given.

Estimated commission uses 8.00%, the merchant's rate for Awin. Awin's own figure applies where it differs.
